

Life Beyond Barriers Rehabilitation Group is an outpatient program that refuses to believe neurological rehabilitation should be one way for all people. Our method is driven by a dedicated team and backed by proven science. Our therapy is intensely personalized and unlike anything else. We surround people with an energetic, active environment and a community that becomes like family. Quite simply, we're setting the standard for what rehabilitation should look like - bold, exciting, and completely focused on the individual.

A bold way forward

If an individual's central nervous system (CNS) has experienced a traumatic injury, suffered a disease or was born with a developmental related diagnosis, our approach is to challenge the CNS with a game changing combination of proven science, passionate people, and a culture that rises above limitations.
